

ERIN BELOT

Full Stack Junior Developer

erinbelot@gmail.com | 0499 974 677 | 60 Strickland Drive, Wheelers Hill

EDUCATION

Coder Academy, Diploma — *Information Technology*

FEB 2018 - JUL 2018

An intense full time bootcamp for career changes. Our major projects were in Ruby for a terminal app, Ruby on Rails, and Javascript in the MERN stack. These projects enabled us to demonstrate our skills in wireframes, user journeys, ERDs, and schemas. Laying out and then building full stack applications, we showcased our apps by hosting them on Heroku or Netlify.

Ruby

Hangman Edumacator was a pair programming terminal app. It has a teacher and a student mode, different difficulty levels. It uses gems and connected to APIs.

Meteor, React, and Semantic-UI

A group project shopping cart for an outside client. I talk more about the project under "Work History". During the group project I focused on creating a search function that could search and return from a database of over 13,000 parts.

CSS3 and HTML5

For my static portfolio I worked hard to write clean, readable code. The app has a number of different pages, uses grid and flexbox and I worked hard on the navigation and design elements.

TECH STACK

Front end: Javascript, React, Redux, Bootstrap, Semantic-ui

Back end: Ruby, Rails, Meteor, MongoDB, Express, Node, SQL

Software: Git, VsCode, Trello, DbDesigner, Figma, Canva

Soft Skills: Agile methodologies, remote work, pair programming

WORK HISTORY

Back2Bikes, Melbourne — *Software Developer Internship*

Aug 2018 - Sep 2018

After completing a group project in Meteor and React for community bike shed Back2Bikes, I was offered an internship to continue working on the components and features we had implemented.

While there, I was mentored and trained to code according to industry best practices. Areas of focus included:

ERIN BELOT

Full Stack Junior Developer

erinbelot@gmail.com | 0499 974 677 | 60 Strickland Drive, Wheelers Hill

SKILLS

In my internship and over the course of my study, I've developed a keen interest in web development. Always learning and keen to do things right, I've grappled with a range of languages, frameworks and libraries, including:

- **HTML:** Using the latest HTML5 tags, aiming for concise and semantic HTML.
- **CSS:** Using both grid and flexbox, as well as other CSS3 functions.
- **Javascript :** Including the fundamentals of vanilla JS. I have used jQuery, ReactJS and more on the front-end, and various Node JS libraries on the back-end.
- **Ruby :** I have a thorough knowledge of the fundamentals of Ruby. And use that knowledge to tinker and play with fun problems as well as build fleshed out apps.

Other (various): I have been active in the tech community, giving talks at various tech meetups. Including the freecodecamp, Meteor, and RORO meetups. I am well versed in Agile methods and Trello. Design technologies such as ERD, user flow, user stories, and wireframing. I also practice mobile first design.

WORK HISTORY (CONT.)

- Writing test scripts, manual testing, and using VSCode debugger.
- Git source control, project deployment and development environments.
- Storybook and Semantic UI for styling.

EXPERIENCE OUTSIDE TECHNOLOGY

St George, Melbourne — *Customer Service Banker*

Dec 2017 - Present

On the front line of customer service, I'm in banking essentials and responsible for all enquiries pertaining to - accruing interest, statement cycles, balance transfers, activating and canceling cards, internet banking resets, and basic home loan redraw enquiries.

Royal Flying Doctor Service, Darwin — *Duty Manager*

Jun 2016 - Jul 2017

A Melbourne native, I spent the last 2 years in Darwin. On top of providing excellent customer service, I've helped to supervise and run the city's RFDS tourism facility, brokered relationships with commercial partners and proposed and implemented a social media branding strategy for the local organisation.
